ABSTRACT

This document offers a summary report of degrees granted at Arkansas state and independent higher education institutions for 1988-89 and highlights trends over a 5 year period. A summary section notes that total degrees conferred numbered 11,769, an increase of 326 from the previous year. The increase was caused by a rise in baccalaureate degrees granted at public institutions. Education continued to account for the largest number of Masters degrees. Doctoral degrees have declined over the past 4 years with most doctoral degrees granted in education and life sciences. Of first professional degrees, 343 were conferred, a decrease of 7 percent from the previous year due in part to a decrease in law school graduates. A special analysis of education degrees finds that implementation of new state public school standards has created demand for teachers trained in mathematics, foreign languages, and the sciences. Despite this demand, a large portion of education degrees continue to be awarded in physical education and elementary education. Appendix A lists degrees granted by public and private institutions 1984-85 to 1988-89. Appendix B contains tables showing degrees and awards conferred in 1988-89 by two-year institutions, degrees granted by four-year state institutions, and degrees granted by independent institutions in 1988-89. Appendix C and D provide a glossary and list of institutional names and abbreviations. (JB)

This is an increase of 326 awards over the previous year and a 4.6% rise over the 1986-87 total. Baccalaureate degrees were primarily responsible for the increase, rising by 288 or 4% from 1987-88. The trend in completions (degrees and other awards) at all Arkansas institutions of higher education is shown in Figure 1.

The summary of 1988-89 completions by degree type for Arkansas public and independent institutions can be found in Table 14. Arkansas public institutions accounted for over 85% of all awards, conferring all doctoral and first professional degrees. Independent institutions continue to be strong at the baccalaureate level, awarding 1,490 bachelor's degrees in 1988-89, which represented over 88% of all completions in the independent sector.

The following section provides an analysis of various trends in degree-granting activities in Arkansas by degree level, particularly in public higher education. Illustrations include tables showing the academic disciplines with the highest degree productivity, graphics depicting five-year trends, and comparisons between Arkansas and the nation in regard to completions activity in certain discipline areas.

FIVE-YEAR TREND AT ARKANSAS PUBLIC COLLEGES AND UNIVERSITIES

At the Arkansas public colleges and universities, 10,081 degrees and other formal awards were granted in 1988-89, 280 awards higher than in 1987-88. Figure 2 depicts the trends for the previous five years for all awards conferred by the public institutions. Degree programs experiencing declines were specialist, doctoral, and first professional degrees. However, certificates, associate, baccalaureate, master's, and post first professional degrees increased over the previous year.

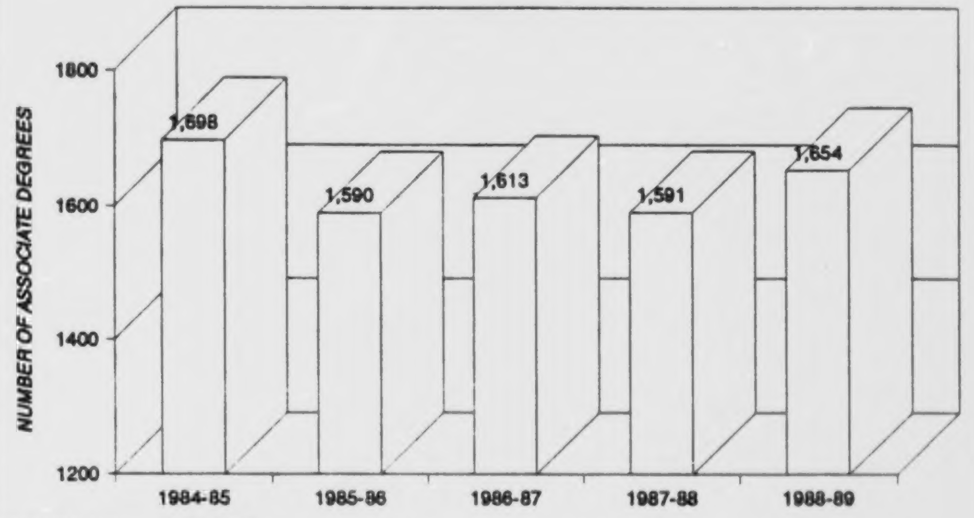

FIGURE 3. ASSOCIATE DEGREES GRANTED BY ARKANSAS PUBLIC INSTITUTIONS, 1984-85 THROUGH 1988-89

SOURCE: IPEDS FORMS

Arkansas public institutions of higher education conferred 1,654 associate degrees in 1988-89, the highest number since 1984-85. Over the past five years, the number of associate degrees have stayed fairly stable, fluctuating between 1,590 and 1,698. Figure 3 illustrates this five-year trend.

Like the total number of associate degrees, the top five ranking disciplines of associate degrees have remained fairly constant, as shown by Table 15. Liberal and General Studies continues to be the most popular field of study for students seeking an associate degree, with Health Sciences and Business and Office ranking second and third, respectively. The Engineering and Engineering-Related Technology field had a dramatic increase in associate degrees, rising from 87 in 1987-88 to 120 in 1988-89, and moved to a fourth place ranking over the Marketing and Distribution field for the first time. Overall, more than 88% of all associate degrees were in the top five disciplines.

2. Baccalaureate Degrees

Bachelor's degrees were awarded to 5,813 students at Arkansas public colleges and universities in 1988-89. The number of new baccalaureate graduates in this period represents a 3.1% productivity increase over the previous year and the highest number of degrees awarded since 1985-86. These figures follow expected national trends for this period as reported in the National Center for Education Statistics (NCES), "Survey Report" publication. Figure 4 shows the trend over a five-year period.

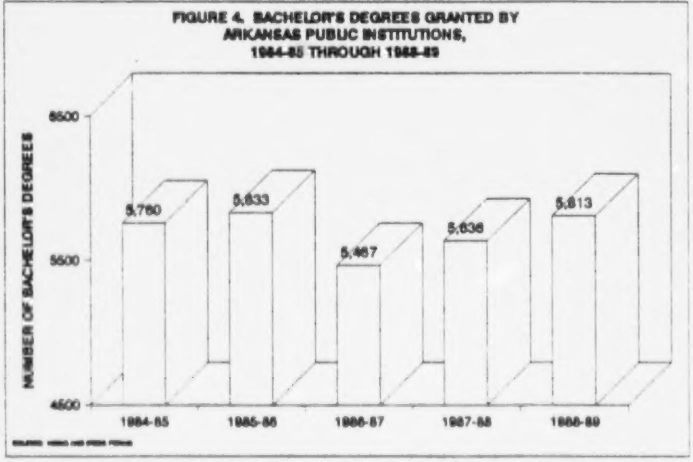

FIGURE 4. BACHELOR'S DEGREES GRANTED BY ARKANSAS PUBLIC INSTITUTIONS, 1984-85 THROUGH 1988-89

The most popular disciplines for baccalaureate awards are shown in Table 16. Business and Management baccalaureate awards have maintained an upward trend over the last 9 years showing a 4% increase over the previous year. Baccalaureate awards in Education increased 2% compared to the 1987-88 award period and have shown an upward trend during the last four years. Engineering awards experienced a 15% increase while the field of Health Sciences showed a 15% decrease. Social Sciences awards replaced Communications as one of the five most popular disciplines. According to the NCES Digest of Education Statistics, published in 1988, Social Sciences is the second most popular field in the nation.

Baccalaureate degrees in the top five disciplines account for 66% of all baccalaureate degrees awarded at the state's public institutions. Sixty-one percent of all degrees awarded by Arkansas institutions are baccalaureate awards compared to 40% nationally, as reported in the NCES, "Survey Report."

3. Master's Degrees

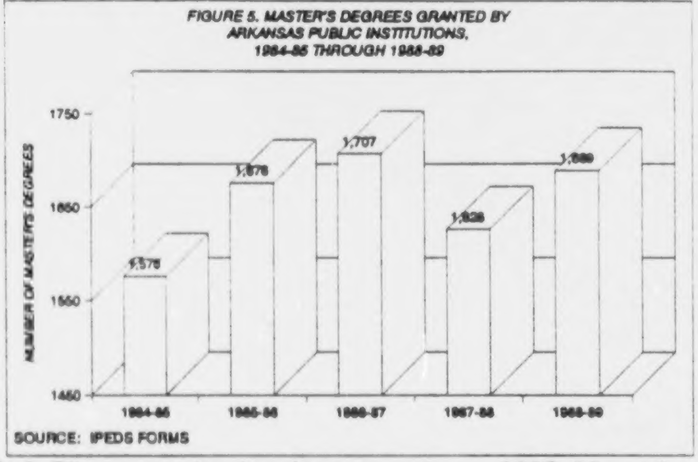

FIGURE 5. MASTER'S DEGREES GRANTED BY ARKANSAS PUBLIC INSTITUTIONS, 1984-85 THROUGH 1988-89

SOURCE: IPEDS FORMS

The Arkansas public institutions conferred 1,689 master's degrees in 1988-89 (see Figure 5). This represents a 3.9% upturn over the 1987-88 academic year and a 7.2% increase over 1984-85. Arkansas independent institutions awarded 85 master's degrees in 1988-89, a decrease of 15.8% from the previous year. This is probably due to the phasing out of master's degrees at one school. Overall, the state of Arkansas experienced a growth of 2.7% in master's degrees since 1987-88 and a 5.3% increase over a five-year period.

Education degrees, at 47.1% of the total, continue to account for the largest number of master's degrees granted. In some state higher education institutions, Education is the only graduate degree program offered. The most recent national data show that Education is also at the forefront in the number of master's degrees awarded in the United States. In terms of percentages, more than 25% of all master's degrees conferred in this country were in the field of Education.

Table 17 illustrates the largest degree-producing disciplines at the master's level. Education, as mentioned previously, continues to comprise a large majority of degrees at this level. Following Education, Business and Management, Health Sciences, Public Affairs, and Engineering are the disciplines that produced the greatest number of master's degrees. All five of these fields have produced the largest number of graduates for the past four years. While the decline in Engineering degrees seems shocking at first, a closer study revealed that this was simply due to the Operations Management Degree being reclassified from the Engineering discipline to the Business and Management field.

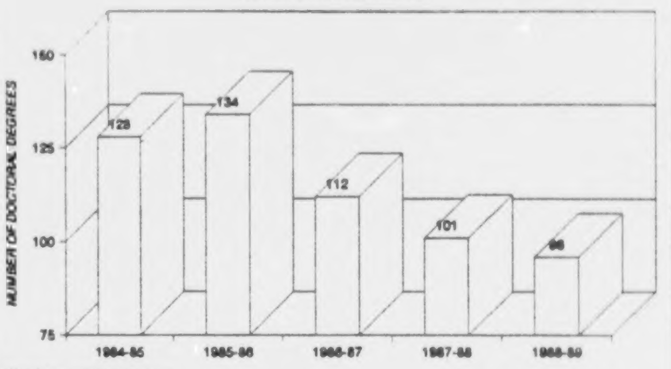
4. Doctoral Degrees

Doctoral degrees conferred at the University of Arkansas, Fayetteville, have declined over the past four years. UAF granted 96 doctorates in 1988-89, a drop of 28.4% from 1985-86 and the lowest number of doctoral awards since 1978-79. All doctoral degrees are granted through the University of Arkansas, Fayetteville, with six programs being held on the UAMS campus. Figure 6 illustrates the shrinkage in doctoral awards over the last five years.

FIGURE 6. DOCTORAL DEGREES GRANTED BY ARKANSAS PUBLIC INSTITUTIONS, 1984-85 THROUGH 1988-89



SOURCE: IPEDS FORMS

The Education field continues to attract the largest number of doctoral students in Arkansas. One-third of the doctorates received in 1988-89 were in Education. As shown by Table 18, this percentage has gradually risen over the last three years. Nationally, there are over twice as many doctoral degrees granted in Education as there are for any other degree program, which also holds true for Arkansas.

The five disciplines producing the largest number of doctoral degrees are reported in Table 18. In the Life Sciences area, 100% more students received a doctorate in 1988-89 than the previous year, which resulted in this discipline ranking second in the number of doctoral awards. Conversely, the Physical Sciences area, which had ranked second for the past two years, dropped out of the top five. Overall, the top five ranking disciplines accounted for over 80% of all doctoral degrees.

5. First Professional Degrees

Arkansas institutions of higher education awarded 343 first professional degrees in 1988-89, which was a decrease of 7.0% over the previous year. Currently, Arkansas has three institutions that grant first professional degrees. Law degrees are awarded at both UALR and UAF, while medical degrees are granted at UAMS. Both law schools experienced a decline in graduates. UALR awarded 98 law degrees (a decline of 14 from the previous year) and UAF granted 120 degrees (15 less than in 1987-88). The medical school graduates totalled 125, up from 122 the previous year.

Figure 7 indicates that the number of graduates peaked in 1987-88, primarily as a result of the increase in law school graduates. UAMS continues to maintain a steady number of graduates, usually between 120 and 130. The most recent national figures show that the number of law school graduates is declining and like Arkansas, the total degrees awarded in Medicine has remained fairly constant.

Summary

All in all, degree productivity in Arkansas has risen over the past three years, indicating that the public has become well aware of the benefits of an advanced education in our society. It is believed that this trend will continue due to the importance that corporate and civic leaders, as well as the Governor of Arkansas and the President of the United States, place on education.

DEGREES GRANTED IN EDUCATION AT ARKANSAS COLLEGES AND UNIVERSITIES

Of all degrees granted at or above the baccalaureate level in Arkansas higher education, the academic discipline of Education is the largest. In 1988-89, 26.5% of all degrees awarded at these levels were in Education. Table 19 provides a breakdown of all degrees awarded in Education at or above the baccalaureate level over the previous five years.

The importance of Education as a field of study goes beyond degree productivity at the 32 colleges and universities in Arkansas. The state's public school standards, increased attention on pre-collegiate preparation by high school students, and various studies of teacher education programs by state and national groups all serve to underscore the central role of this discipline. Recent trends in degree-granting activity in the field of Education are discussed in this section.

1. Bachelor's Degrees in Education

Figure 8 shows that 23% of all bachelor's degrees granted in Arkansas in 1988-89 were in Education and were conferred by nine public universities and seven independent institutions. The number of degrees awarded in Education since 1984-85 has increased by 14% which, stated in absolute terms, represents an increase of 202 degrees. It appears that the earlier downward trend in the number of Education degrees is reversing itself.

2. Bachelor's Degrees in Physical Education

Implementation of the Arkansas public school standards has created demand for teachers trained in such fields as Mathematics, Foreign Languages, and the Sciences. Meeting this demand is an issue for school boards, administrators, and colleges of education. It is in this context that concern has continued to be expressed on occasion about the number of physical education graduates from Arkansas teacher education programs.

In every reporting period since 1984, Physical Education has been one of the top two most popular fields of study for teacher education students in Arkansas, exceeded only by Elementary Education. The proportion of Physical Education degrees awarded to those in teacher education programs in the nine public universities has ranged from 19% in 1984-85 to 13% in the past two reporting periods. The trend in the number of baccalaureate degrees awarded in Physical Education since 1984-85 is shown in Figure 9, when the total of 225 represented 19% of the total awards in teacher education. During the 1988-89 reporting period, 173 awards were conferred, 13% of the total. In comparison, teacher education awards in Science, Mathematics, and Foreign Languages totaled 48, 45, and 29, consecutively. These disciplines, together, represent 7% of the total.

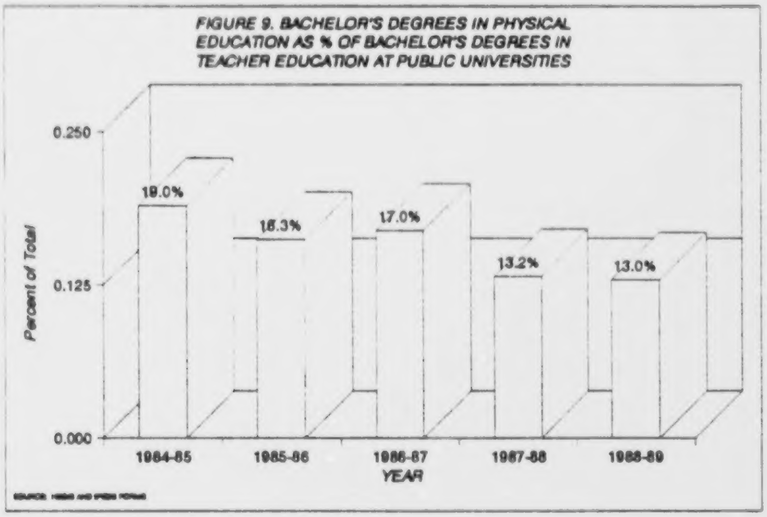

FIGURE 9. BACHELOR'S DEGREES IN PHYSICAL EDUCATION AS % OF BACHELOR'S DEGREES IN TEACHER EDUCATION AT PUBLIC UNIVERSITIES

This same pattern exists at Arkansas' independent institutions. In 1984-85, 29% of all education bachelor's degrees from programs in teacher education were in physical education, as were 20% in 1988-89. During the same five-year period, physical education has been second only to Elementary Education in awards in these programs. Eight Arkansas independent institutions awarded 8 degrees in Mathematics Education and 4 in Science Education. No degrees in Foreign Languages were conferred by the independent institutions.

3. Master's Degrees in Education

A majority of students who receive their Master's degrees in Arkansas obtain it in the Education discipline. A 5% decrease in the 1988-89 reporting period, a difference of 46, occurred since the number of degrees in Education peaked at 915 in 1986-87 (see Table 19). Figure 10 shows that the 869 awards conferred in 1988-89 represent 49% of the total Master's degrees awarded in Education, an increase of 77 since 1984-85.

4. Doctoral Awards in Education

One institution in Arkansas awards doctoral degrees in Education. Table 19 shows that the number of doctoral degrees conferred has remained fairly consistent since 1984-85 and that no change occurred from the number reported in 1987-88. According to the "Survey of Earned Doctorates," published by the National Research Council, 20% of all doctorates conferred in 1988 were in Education, while Figure 11, the five-year trend in doctoral degree awards, shows that 33% of the total doctorate degrees awarded in Arkansas were in Education.

1. POSTSECONDARY CERTIFICATE OR DIPLOMA - An award for successful completion of a program designed for completion in less than two full academic years.

2. ASSOCIATE DEGREE - A degree granted upon completion of a program that requires at least two but fewer than four academic years of postsecondary education.

3. BACCALAUREATE DEGREE - A degree granted upon completion of a program than requires four to five years of full-time college work and carries the title of Bachelor.

4. POST-BACCALAUREATE CERTIFICATE - Requires completion of a program of study requiring 30 credit hours beyond the bachelor's degree, but does not meet the requirements of a master's degree. Exclusively for persons who have completed a baccalaureate degree.

5. MASTER'S DEGREE - A degree which requires at least 1 but no more than 2 full-time equivalent years of study beyond the bachelor's degree.
